## Subject: Plane Clean Air™ Filter Endorsement and Testimonials

### Plane Clean Air™ Filter

The Plane Clean Air™ filter is a portable device that removes 99.5% of viruses, bacteria and other contaminants from the air stream that flows onto the passenger's face. The device has been used on several hundred flights by people who desire to improve their travel experience with cleaner air. Some of their comments are listed below:

Figure 1: Plane Clean Air™ Filter

\*US Patent number 6,610,116  
\*Canada and worldwide patents pending.

### Endorsement

"I'm excited and delighted about the Plane Clean Air filter because it enables passengers to purify the air that comes directly to them from the air blower above their seat. I am a retired flight attendant after 21 years of flying. I wish this air filter had been available during that period because the more passengers that use it, the better the air is for everybody, including the crew. Now that the Plane Clean Air filter has come on the market, it's a permanent part of my flight kit."

Diana Fairechild, 10 million miles as flight attendant, author of Jet Smarter and [Flyana.com](http://Flyana.com)

### Testimonials

I had to write you to tell you about my experience with my "Plane Clean Air" filter. When I travel on an airplane, I have to shut off all the air vents above because it always makes me congested which lasts for days. I tried my Plane Clean Air on a flight to the Dominican Republic a few weeks ago.

To my amazement I was able to open the air vent full blast and arrived in Puerto Plata with absolutely no congestion. I was able to enjoy my flight and the days after. I will never get on an airplane without my Plane Clean Air filter.

Your filter is working to help people! I was on a flight last night from Orange County to Reno. The lady sitting next to me was in chemotherapy for cancer. She was wearing a mask for protection. I gave her my Plane Clean Air filter and she was so thankful. She is traveling to the Bahamas and Panama over the next month and will use it. I gave her my card and she sent me the email attached below.

"Hello Doug, Thank you so much for the airplane air filter. Amazing how things happen in our lives. Flying across country all day wearing a mask was not sounding too fun for me so I am quite grateful for the alternative. Take care, Mary"

She was so appreciative. Also since I gave her my only one I need to order another!

We recently took a vacation to Hawaii and we wanted to make sure everything was perfect. Some friends had recently gone, and one of them got sick from the air on the plane. We saw the "Plane Clean Air" and our prayers were answered!

We enjoyed the feeling of clean air bathing us on the plane and neither of us got sick. The filter made the air smell clean and fresh. It was easy to install, easy to understand, and was also a great conversation starter. I think we sold several units for you to the other passengers and crew. This product is wonderful!

I used Plane Clean Air on a recent flight from San Francisco. It was very simple to use, and could be easily adjusted to any seating position. There was a noticeable improvement in the quality of the air, resulting in an air flow that was much more refreshing. If you are concerned with the quality of a plane's recycled air, I highly recommend Plane Clean Air.

Mark Briggs  
Mesa, Arizona

I used the Plane Clean Air filter on a trip from San Diego to Minneapolis. I was surprised at how easy it was to actually install the filter to the nozzle. Just a couple of steps to follow and you are ready to go! I noticed a difference in the quality of the air as soon as I put it up. The most unique thing about the product is its small design and how efficiently it works.

The person sitting next to me on the plane asked what the product actually was and how it worked. Several other people really liked the filter and wanted to know where to order it. What a cool conversation starter!

I wanted take a moment to tell you of my experience with your product. I recently used the Plane Clean Air filter on a business trip from Los Angeles to Minneapolis with one connection. The filter attached to an Airbus A380 and the Boeing 757 air nozzle in seconds.

It was easy to use and created an instant air curtain around me. Your product gave me piece of mind that I had an added degree of protection from the airborne germs that the other passengers were sharing. Thanks for such a great product!
