Carbon Block filters for Chlorine,
Taste and Odor reduction*

Matrikx® CTO® filters, powered by Greenblock®, are made using 100% coconut shell carbon, a renewable, and ecologically sustainable material. The carbon is processed into blocks using a unique binder system and proprietary manufacturing techniques to produce filters with a greater number of micro-pores and available carbon surface area, which display superior capacity and kinetic dynamics.

Features & Benefits

Matrikx® CTO® carbon block filters are now powered by **GreenBlock®** technology. They feature:

- 5 micron nominal filtration.
- Exceptionally low pressure drop.
- High dirt holding capacity.
- Excellent chemical contaminant reduction.
- High Adsorptive Capacity and Efficiency.
- NSF and WQA certification for Material Safety.
- California Prop. 65 compliance.

*Not performance tested or certified by NSF or WQA

Directions for use

Place cartridge in an appropriate housing and flush for a minimum of 20 minutes prior to use. Use only with microbiologically safe and adequately disinfected water.

KX Technologies Model:

Manufactured by:

KX Technologies LLC (US), 55 Railroad Avenue,
West Haven, Connecticut 06516, USA

The filter cartridge is tested and certified by NSF International against NSF/ANSI Standard 42 for material safety requirements only.

The filter cartridge is tested and certified by WQA against NSF/ANSI Standard 42 for material safety requirements only.

This filter cartridge is certified by the Water Quality Association to WQA/ASPE/ANSI S-803 for sustainability.

CTO® PLUS

Carbon Block Filters for Chlorine Taste and Odor and VOC reduction*

Matrikx® CTO®Plus filters, powered by GreenBlock®, are made from 100% coconut shell carbon, a renewable, and ecologically sustainable material. The carbon is processed into blocks using a unique binder system and proprietary manufacturing techniques to produce filters with a greater number of micro-pores and available carbon surface area, which display superior adsorption capacity and kinetic dynamics.

Features & Benefits

Matrikx® CTO®Plus carbon block filters are now powered by **GreenBlock®** technology. They feature:

- 1 micron nominal filtration.
- High capacity Chlorine reduction.*
- Exceptionally low pressure drop.
- Excellent chemical contaminant reduction.
- High dirt holding capacity.
- High Adsorptive Capacity and Efficiency.
- NSF and WQA certification for Material Safety.
- California Prop.65 compliance.

*Not performance tested or certified by NSF or WQA

Carbon Block Filters for: Chlorine Taste and Odor, VOC, Cyst and Lead reduction*

Matrikx® Pb1® filters, powered by GreenBlock®, are made from 100% coconut shell carbon, a renewable, and ecologically sustainable material. The carbon is processed into blocks using a unique binder system and proprietary manufacturing techniques to produce filters with a greater number of micro-pores and available carbon surface area, which display superior adsorption capacity and kinetic dynamics.

Features & Benefits

Matrikx® Pb1® carbon block filters are now powered by **GreenBlock®** technology. They feature:

- 0.5 micron nominal filtration.
- High capacity Chlorine reduction.*
- Formulated for cyst and heavy metal reduction.
- Exceptionally low pressure drop.
- High dirt holding capacity.
- Excellent chemical contaminant reduction.
- High Adsorptive Capacity and Efficiency.
- NSF and WQA certification for Material Safety.
- California Prop. 65 compliance.

Chlora Guard

Carbon Block Filters for Chlorine Taste and Odor and Chloramine reduction*

PROUD TO BE

Matrikx® ChloraGuard® filters, powered by GreenBlock®, are made from 100% coconut shell carbon, a renewable, and ecologically sustainable material. The carbon is processed into blocks using a unique binder system and proprietary manufacturing techniques to produce filters with a greater number of micro-pores and available carbon surface area, which display superior adsorption capacity and kinetic dynamics.

Features & Benefits

Matrikx® ChloraGuard® carbon block filters are now powered by **GreenBlock®** technology. They feature:

- 1 micron nominal filtration.
- High capacity Chlorine reduction.*
- Made from proprietary catalytic carbon which delivers 4 times the capacity for monochloramine reduction versus standard activated carbon.
- High dirt holding capacity.
- Exceptionally low pressure drop.
- Excellent chemical contaminant reduction.
- High Adsorptive Capacity and Efficiency.
- NSF and WQA certification for Material Safety.
- California Prop. 65 compliance.

*Not performance tested or certified by NSF or WQA
