

Healthy Climate HCWHD4-80, Whole Home Dehumidifier, 80 Pints, 120V

Cat # : 22B88

Model/Part # : HCWHD4-80

Product Overview

- Healthy Climate Whole Home Dehumidifier is designed to control humidity throughout the home or in specific locations such as an attic, crawlspace or basement
- Also used for zoned dehumidification and ventilation control
- Humidity sensor automatically and continually measures the relative humidity
- Based on sensor measurement, the unit will operate to control the humidity based on the set point
- Zoning option dehumidifies a "Primary" zone space (example: living space) or a "Secondary" zone space (example: basement) to control humidity levels in different areas as needed
- Patented, built-in ventilation feature allows fresh air to be brought into the home from the outside
- NOTE - If the dehumidifier is installed in an attic or location requiring leak protection, the unit should be placed in a secondary condensate drain pan with a normally closed condensate overflow safety switch (float switch)

Specifications

Brand	Healthy Climate
Catalog Number	22B88
Model/Part Number	HCWHD4-80
Minimum Order Quantity	0.0
Base Unit Of Measure	Unit(S)
Product Depth	14 In
Product Height	15.625 In
Product Width	34 In
Gross Weight	63 LB
Family	HCWHD4
Amperage (AMPs)	5.1 Amp
Product Length	34 Inch
Family	HCWHD4
Product Voltage	120V
Pints Per Day	80 Pints
Product Depth	14 Inch
Product Height	15.6 Inch
Product Width	34 Inch
Noise Level	45 dB

Type

Whole Home Dehumidifier
